PROBLEM SOLVING

CAD SKILLS

PROFILE

I am a recent Interior Design Graduate passionate about design and looking to pursue a career in this industry. I pride myself in being punctual, positive and reliable. Designing has made me consider myself to be creative which includes thinking of innovative new ideas or creative ways of working, whether on imaginary projects at university or live projects throughout my placement. Having a year placement incorporated into my degree developed my ability to work in a team further to produce the most effective outcomes. Finishing my degree whilst under the conditions of the Covid-19 situation also showed my resilience and ability to work independently and efficiently. As well as having experience in the design sphere I have also had experience working within customer services which has helped me to realise I am a very friendly person that finds enjoyment in being around others whilst enjoying helping them.

EXPERIENCE

**Placement Student | Keane Brands Design Associates, Birmingham |
August 2018 - August 2019**

Throughout the year I was involved in working within a team to help and support them at a range of different points within the design process. This predominantly involved working on producing visuals and often under tight deadlines. Other responsibilities included helping produce presentations through research and concepts. I was also responsible with meeting with suppliers to keep the sample library up to date helping to improve my knowledge in terms of materials and latest trends. Working on a range of projects required learning, understanding and keeping up to date with all of these projects in order to allow me to be able to work on them when required. This resulted in a couple of instances in which I had the opportunity to oversee some projects temporarily when the lead designers were away. Working within a design office, attending meetings and site visits has allowed me to gain experience needed to give me the confidence within the design industry.

**Customer Service Representative | Damartex UK Ltd. Bingley, Bradford |
May 2015 - Present**

My responsibilities in this role includes communicating effectively over the phone when answering calls from customers to place their orders, arrange collections and take payments. Also requires problem solving when trying to help with any issues and complaints. Occasionally I am required to key in orders accurately from orders sent through the post.

Megakreations Owner & Designer | Bradford | October 2018 - Present

Recently I have worked on a personal project of creating a freelance Graphic Design business that creates Wedding and Event stationery, artwork prints and branding packages. Within this I have had to learn about running and maintaining a business which includes dealing with finances as well as time management for meeting deadlines for customer satisfaction. It has also been useful for maintaining and learning new skills that advance my Graphic Design ability but can be transferred to level up my Interior Design skills.

Volunteer | The Church of Jesus Christ of Latter-Day Saints

I have previously been involved in volunteer work with my local church which would help groups of different ages to provide activities and events and host these events. Sometimes has included public speaking and giving presentations.
